Yevgeny B. Levitov, PhD

Yevgeny B. Levitov, Ph.D. has extensive electrical and mechanical engineering background and experience in international marketing, including Russia and Europe.

In the former Soviet Union, Dr. Levitov spent more than fifteen years working in the image recognition field and performing R&D for classified projects for the Russian Government. Dr. Levitov served as the Vice President of Scientific–Production Union “Medoborudovanie”, the largest Russian manufacturer of medical equipment. He headed the International Engineering Department where he managed the design, development and marketing of computerized medical equipment.

In the US, he served as Design Engineer/Project Manager for Kinetic Concept where he managed design and development of mechanical, electrical and pneumatic systems for the newest medical equipment for critical care. Dr. Levitov then served as Product Engineer/Product Manager at Pass and Seymour/LeGrand, one of the largest manufacturers of wiring devices where he headed research and implementation of their newest computerized PCB testing equipment as well as redesign of company products onto a modern component base.

Dr. Levitov is President and Co-founder of FaceKey.
